

In the Claims:

Please cancel claims 1-17. Please add new claims 18-33 as follows:

Claims 1-17 (Cancelled).

18. (New) A combination container and applicator comprising:
- a) a container having an outside surface and an interior; and
  - b) said applicator comprising a tube, said tube being formed of material constructed and arranged to be magnetically attracted to the container wherein said tube engages said outside surface of the container for releasable affixation to said outside surface.
19. (New) The combination of claim 18, said container comprising a nozzle.
20. (New) The combination of claim 19, said tube being constructed and arranged to be coupled to said nozzle.
21. (New) The combination of claim 19, wherein the container is under pressure.
22. (New) The combination of claim 18, said container being formed of a material constructed and arranged to be magnetically attracted to said tube.
23. (New) The combination of claim 18, wherein the tube is constructed of ferromagnetic material.
24. (New) The combination of claim 18, wherein the tube is constructed of flexible magnetic material.
25. (New) The combination of claim 18, wherein the tube is constructed of iron material.
26. (New) The combination of claim 18, wherein the tube is constructed of steel material.
27. (New) The combination of claim 18, the container comprising a cylindrical portion having a first length dimension, the tube having a second length dimension which is shorter than the first length dimension.
28. (New) A combination container and applicator comprising:
- a) a container having an outside surface and an interior; and

- b) said applicator comprising a tube, said tube being formed of material constructed and arranged to be magnetically attracted to the container for releasable affixation of said tube to said outside surface; and
- c) the container comprising a cylindrical portion having a first length dimension, said tube having a second length dimension which is shorter than the first length dimension.

- 29. (New) An applicator comprising:
  - a tube, said tube being formed of material constructed and arranged to be magnetically attracted to a container having an outside surface wherein said tube is releasably affixed to said outside surface.
- 30. (New) The applicator of claim 29, wherein the tube is constructed of plastic ferrite material.
- 31. (New) The applicator of claim 29, wherein the tube is constructed of flexible magnetic material.
- 32. (New) The applicator of claim 29, wherein the tube is constructed of steel material.
- 33. (New) The applicator of claim 29, wherein the tube is constructed of iron material.

**In the Drawings**

Please replace FIG. 1 with the amended FIG. 1 attached hereto and incorporated by reference herein. The amendment is shown in red ink. A clean drawing is included herewith.
